

JORGE GALLO

Backend & Full-Stack Software Engineer

Bogotá, Colombia | (+57) 319 251 3437 | gallojorge@outlook.com | linkedin.com/in/jorge-daniel-gallo-sanabria | jorgedanielgallo.github.io

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years delivering production web applications for banking and enterprise clients, backed by 6+ years of overall engineering experience. Builds Java / Spring Boot backends, Node.js and NestJS services and Angular front ends, designing RESTful APIs and microservices on AWS under Clean Architecture and SOLID principles. Contributed to the architecture and delivery of digital banking platforms at Banco Davivienda (Grupo Bolívar), one of Colombia's largest financial institutions. Based in Bogotá (UTC-5), available for remote roles across LatAm and U.S. time zones.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, C#, Python, SQL, HTML5, CSS3
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, Node.js, NestJS, Express.js, .NET, Django, RESTful APIs, Microservices
- **Frontend:** Angular, Angular Material, PrimeNG, React, RxJS, Responsive Web Design
- **Databases:** SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, Data Modeling
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, IAM, API Gateway, RDS, DynamoDB), Azure, GCP, Docker, Git, GitHub, Jenkins, CI/CD Pipelines
- **Architecture:** Clean Architecture, Microservices, Event-Driven Design, SOLID, Design Patterns, OOP, Data Structures, API Design
- **Testing & Practices:** JUnit, Mockito, Jasmine, Karma, Postman, Unit Testing, Code Reviews, Scrum, Agile, Jira, Git Flow
- **Data Engineering:** Microsoft Fabric, PySpark, Spark SQL, Delta Lake, Power BI, DAX, ETL/ELT Pipelines

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Contract)

Rootstack | Panama City, Panama — Hybrid | June 2026 – September 2026

- Engineered Python and PySpark pipelines on Microsoft Fabric, migrating legacy Power Query transformations into ETL/ELT architectures on Delta Lake and OneLake.
- Automated Power BI asset migration with PBIP, PBIR and TMDL, scripting dependency mapping and model rewriting to replace a manual, error-prone process.

Agile Software Architect | Full-Stack Developer

Banco Davivienda S.A. (Grupo Bolívar) | Bogotá, Colombia — Remote | September 2023 – February 2026

- Designed application architecture and infrastructure for web-based digital banking products, including the Davivienda SuperApp, serving a customer base in the millions.
- Developed and maintained Java and Spring Boot backend services — business logic, data access layers and RESTful APIs — applying Clean Architecture and SOLID principles.
- Built and integrated Node.js services connecting internal core-banking systems with external partner platforms.
- Defined integration contracts and technical standards with cross-functional banking teams.
- Deployed and operated services in AWS using CI/CD pipelines, unit testing and defect resolution; promoted from Full-Stack Developer to Agile Software Architect.

Junior Full-Stack Developer

Grupo Bolívar S.A. | Bogotá, Colombia — Remote | October 2022 – September 2023

- Developed backend services for enterprise web applications using Java (Spring Boot), Node.js and C# (.NET).
- Designed RESTful APIs and persistence layers across relational and NoSQL databases (SQL Server, MongoDB, DynamoDB).
- Built responsive Angular, Angular Material and PrimeNG components and supported deployments on AWS, GCP and Azure.

Automation Systems Engineer

Instrumentos & Controles S.A. (IYCSA) / West Engineering S.A.S. | Bogotá, Colombia — On-site | January 2020 – September 2022

- Developed control logic, system integrations and data flows for mission-critical industrial systems in the oil & gas sector.

EDUCATION

Bachelor of Science in Mechatronics Engineering

Universidad Nacional de Colombia (National University of Colombia) | Bogotá, Colombia | January 2020

- "Best High School Graduates" merit scholarship for top national exam scores (2014–2019).

CERTIFICATIONS

- Platzi (2024–2026): AWS Cloud Practitioner, Professional DevOps, AWS Compute with EC2, AWS Roles & Security with IAM, Professional Software Architecture, Software Architecture Fundamentals, Clean Code with JavaScript
- Coursera – University of Michigan (2022–2023): Python for Everybody — Programming for Everybody, Python Data Structures, Using Python to Access Web Data

LANGUAGES

Spanish: Native | English: Advanced (C1) — EF SET Certified, 2026
